NOA

Deseti je biblijski praotac i glavni lik u biblijskoj priči o općem potopu. Slične priče upoznajemo i kod ostalih starih naroda (Sumerani-Babilon). Razočaravši se u ljude, Bog je odlučio uništiti ljudski rod, ali je Noi zbog poštenja Bog ostavio još jednu šansu da spasi ljude. Noa sagradi korablju i u nju smjesti svoju obitelj i životinje.

Nakon četrdesetodnevne poplave Noa se zaustavio uz planinu Ararat (današnja Turska).

Postao je novi praotac ljudskoga roda, a voda je u ovom slučaju postala spas ljudskog roda.

NOAH

The tenth biblical patriarch and main character in the biblical story of the Great Flood. Similar stories exist among other ancient civilizations (e.g., Sumerians - Babylonians). Disappointed in humanity, God decided to destroy mankind but gave Noah a chance to save humanity due to his righteousness. Noah built an ark and took his family and animals into it.

After forty days of flooding, Noah landed near Mount Ararat (modern-day Turkey). He became the new progenitor of the human race, and in this case, water became the salvation of mankind.
